

The Latest Statuses of Measurement Instruments

Data obtained every hour (CSV)

| | Measurement instrument failure* ¹ | Status continuously monitored* ² |
|-----------|--|---|
| Unit 1 | None | None |
| Unit 2 | - VESSEL WALL ABOVE BOTTOM HEAD (TE-2-3-69H2) - VESSEL BOTTOM ABOVE SKIRT JOT (TE-2-3-69F2) | None |
| Unit 3 | - VESSEL BOTTOM HEAD (TE-2-3-69L1) - VESSEL BOTTOM HEAD (TE-2-3-69L2) - VESSEL BOTTOM HEAD (TE-2-3-69L3) | None |
| Units 5-6 | None | None |

Data obtained every 6 hours (CSV)

| | Measurement instrument failure* ¹ | Status continuously monitored* ² |
|-----------|---|--|
| Unit 1 | - PCV ambient air radiation monitor (D/W) A - PCV ambient air radiation monitor (D/W) B - Pressure in the suppression chamber | - Reactor water level (Fuel area) A - Reactor water level (Fuel area) B |
| Unit 2 | - SUPPORT SKIRT TOP (TE-2-3-69K1) - VESSEL BOTTOM ABOVE SKIRT JOT (TE-2-3-69F1) - TOP CONTROL ROD DRIVE HOUSING (TE-2-3-69N1) - Pressure in the suppression chamber - PCV ambient air radiation monitor (D/W) B - PCV ambient air radiation monitor (S/C) B - RPV BELLOWS SEAL AREA(TE-16-114R#2) | - Reactor water level (Fuel area) A - Reactor water level (Fuel area) B - VESSEL BOTTOM DRAIN (TE-2-106) - RETURN AIR DRYWELL COOLER (TE-16-114A) - RETURN AIR DRYWELL COOLER (TE-16-114D) - SUPPLY AIR D/W COOLER HVH2-16A (TE-16-114F#1) - Suppression pool ambient air temperature (TE-16-114S) |
| Units 3-4 | None | - Reactor water level (Fuel area) A - Reactor water level (Fuel area) B - RPV pressure A - RPV pressure B - PCV ambient air radiation monitor (D/W) A |

*¹ Measurement instruments judged to indicate incorrect values which cannot be used for monitoring

*2 Measurement instruments under continuous monitoring after reading fluctuation was found
