

## Foundation Concrete Placing Work Started at the Miscellaneous Solid Waste Incineration Building

<Reference>

June 28, 2013

Tokyo Electric Power Company

Construction of the Miscellaneous Solid Waste Incineration Building was started in May 2013, and arrangement of reinforcing steel of the foundation had been implemented.

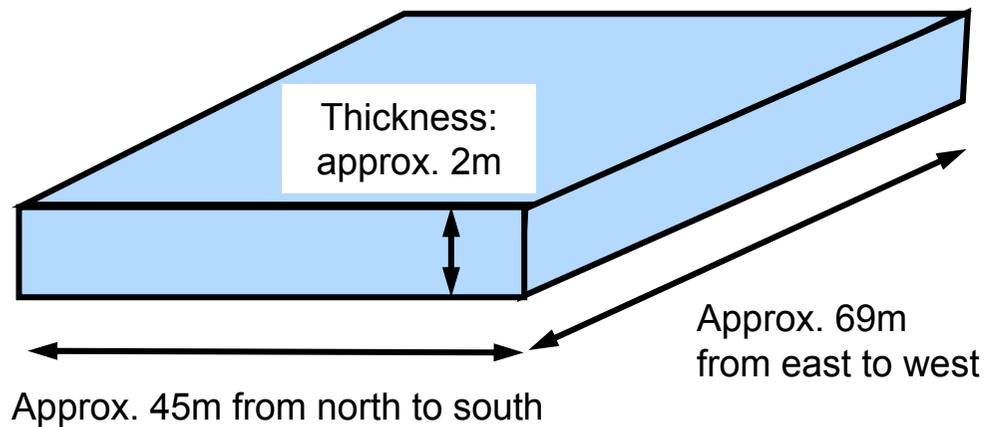

Foundation concrete placing work will be started on June 29.

We will continue the construction work through foundation construction, building construction and installation of incineration facility towards the operation commencement planned in FY2014.
