*①Amount of groundwater and rainwater flowing into reactor and turbine buildinfgs: 305m3/day, ②Amount of water transferred from groundwater drains to reactor and turbine buildings: 348m3/day, ③(Total of ① and ②): 653m3/day, Rainfall: 51.5mm/week

*1 Water gauges in reactor and turbine buildigns were caliberated.

*2 There are cases where there is a difference between the sum of each number on the table above and the "total" because the "total" is the sum of numbers with one digit after the decimal point.

*3 The amount of water levels conjectures uncertain cross-section for corresponding to the water level, that is needed to calculate for storage capacity of centralized reactive waste treatment facility.

*4 The amount of water levels was revision the cross-section for corresponding to the water level, that is needed to calculate for storage capacity of centralized reactive waste treatment facility from June 1, 2017 on.

*5 "①Amount of groundwater and rainwater flowing into reactor and turbine buildinfgs" data of November 2, 2017, was revised.
(The correct data: 305m3/day, The incorrect data: 309m3/day,)
