

Progress Status of Demand-side Countermeasures

Based on the contents of “Outline of Countermeasures for Power Supply and Demand During Summertime”, TEPCO has been implementing to request cooperation in conserving electricity and to introduce efficient conserving electricity method to the customer.

1. Affiliation and expansion status of demand and supply adjustment contract

As a result of the cooperation of many customers by increasing, extending and dispersing holidays, we have secured 3.2GW (2.1GW as planned adjustment, 1.1GW as occasional adjustment) as effective adjustment capability.

* Including demand control effect of usage limitation by Chapter 27 of Electricity Business Act.

2. Status about request of cooperation in conserving electricity and introduction of efficient conserving electricity method

(1) Customers above 500kW of contract capacity

We have implemented request cooperation in conserving electricity and consultation for conserving electricity to all of approximately 14,000 customers.

(2) Customers below 500 kW of contract capacity receiving high-voltage electricity

We have requested cooperation in conserving electricity to all of approximately 220,000 customers, and also confirmed the request for reduction of contract capacity. As a result, we have received request for reduction of contract capacity from over 120,000 customers.

(3) Customers receiving low-voltage electricity

- We have visited municipalities, residents' associations and various communities, and made explanation about power supply and demand outlook in this summer and request for conserving electricity.
- In order to inform customers easily about the effect of conserving electricity from “electricity invoice” on August, we will indicate the reduction ratio in it in case there is a reduction compared with

same month last year. < Please see reference 1 >

(4) Others

- From the internet contents “Declaration for conserving electricity by household” which is provided by the government from July 1st, the actual electricity usage in the previous year and conserving electricity result in this year etc. are provided for every customer by collaboration with TEPCO. < Please see reference 2 >
