* Density by the announcement of Reactor Regulation is stated with an amount converted from $\mathrm{Bq} / \mathrm{cm} 3$ to $\mathrm{Bq} / \mathrm{L}$.
* Data of other nuclides are under evaluation.
* In the case that two or more kinds of nuclides exist, sum of each scaling factor to the density limit is compared with 1.
* "ND" means the sampled data is below measurable limit. I-131: approx. 1.0Bq/L, Cs-134: approx. 1.1Bq/L, Cs-137: approx. 1.2Bq/L

Please note that these nuclides are sometimes detected even when they are below the limits, contingent on the detector or samples.
