<Marine Life Rearing Log>

9 AM, October 11, 2023

Weather: Sunny

Water temperature: 18.5°C

The freeze-drying of edible parts to measure the tritium in flounder and abalone was conducted in 50cc centrifuge tubes at the beginning of the study, but now is done collectively in large trap tubes because the dried flesh is also analyzed. Over the past year, we have acquired know-how on a variety of issues, such as how to prevent contamination by impurities.

Organically bound tritium (OBT) in flesh collected by drying the meat in a desiccator
