Fukushima Daiichi Decontamination &
Decommissioning Engineering Company

- Today, November 12, the fuel debris sampled from Unit 2 was transported to the Japan Atomic Energy Agency (JAEA) Oarai Nuclear Engineering Institute at 2:41 PM.
- The transported fuel debris will be analyzed over a period of several months to approximately one year at analysis facilities such as the JAEA, etc., and the data acquired will be leveraged to deliberate when gradually enlarging the scope of fuel debris retrieval in the future.
- We will continue to prioritize safety as we move forward with this task.
