

On the Meeting of Relevant Ministers and Others Toward the Steady Implementation of the Basic Policy on the Handling of ALPS Treated Water (9th Meeting)

August 25, 2026

Tokyo Electric Power Company Holdings, Incorporated

The 9th Meeting of Relevant Ministers and Others Toward the Steady Implementation of the Basic Policy on the Handling of ALPS Treated Water was held, during which the status of implementation of the Basic Policy on the handling of ALPS treated water and the direction of future measures were reviewed and confirmed.

Since the commencement of the discharge into the sea in August 2023, the sea release of ALPS treated water from Fukushima Daiichi Nuclear Power Station has been carried out as planned, in accordance with domestic safety standards that conform to international standards, and only after sufficient confirmation of safety for both human health and the environment.

Going forward, we will continue to maintain a high level of vigilance in ensuring the safety and quality of the sea release operations. At the same time, we will sincerely work toward: ensuring transparency through monitoring activities and IAEA reviews; providing accurate and easy-to-understand information to domestic and international audiences; promoting the consumption of fisheries products and supporting their distribution; and providing appropriate compensation in the event of damages. As the entity responsible for implementation, we will continue to fulfill our responsibilities.
