

Signing of an Information Exchange Agreement on Nuclear Energy with PSEG Nuclear LLC

October 2, 2026

Tokyo Electric Power Company Holdings, Inc.

Today, TEPCO signed an information exchange agreement on nuclear energy with PSEG Nuclear LLC* (hereinafter referred to as “PSEG Nuclear”), a US nuclear operator that has achieved excellence in nuclear power operation.

With the understanding that mutually exchanging information with overseas operators is vital for improving nuclear safety, PSEG Nuclear and TEPCO have strengthened their relationship through in-country visits and information exchanges. Through these efforts, TEPCO has obtained know-how about PSEG Nuclear’s operations and maintenance and is in the process of reflecting that knowledge in its own policies.

Both parties have now signed an information exchange agreement for the purpose of maintaining their good relationship and further promoting the sharing of experience and practices that will improve nuclear safety. The scope of the agreement is as follows:

- Scope of the information exchange agreement
 - Acquiring methods for schedule management and quality control during outages
 - Gaining hands-on knowledge of maintenance and inspection techniques that contribute to improving equipment reliability
 - Learning from best practices pertaining to work safety and radiation control
 - Gathering examples of how operations and maintenance data is leveraged, digitalized, and made more efficient
 - Understanding the approach that nuclear power stations in the United States take to handling regulatory issues and safety culture, etc.

TEPCO will continue to strive to further improve the safety and reliability of nuclear power stations based on knowledge obtained from overseas.

* PSEG Nuclear LLC:

Nuclear power company and subsidiary of the Public Service Enterprise Group (PSEG) in the United States. PSEG owns and operates the Hope Creek Generating Station (BWR x 1) and co-owns the Salem Nuclear Generating Station (PWR x 2) and the Peach Bottom Clean Energy Center (BWR x 2), which are responsible for providing electricity in the state of New Jersey. The company is actively

engaged in long-term operation, aging management, and risk-informed maintenance activities.
