|                       |                |                                      | From              | То                | I-131<br>(approx. 8 days)                               | Cs-134<br>(approx. 2 years) | Cs-137<br>(approx. 30 years) |
| Fukushima Daiichi NPS | (1)            | Environment<br>Management Building   | 2014/7/1 10:50 AM | 2014/8/1 9:45 AM  | ND                                                      | 45                          | 120                          |
| Fukushima Daini NPS   | (12)           | Administratrative<br>Office Building | 2014/7/1 2:30 PM  | 2014/8/1 10:40 AM | ND                                                      | ND                          | ND                           |

<sup>\*</sup>  $Bq/m^2 = MBq/km^2$ 

I-131: Approx. 69Bq/m<sup>2</sup>, Cs-134: Approx. 27Bq/m<sup>2</sup>, Cs-137: Approx. 35Bq/m<sup>2</sup>)

As the detection limit may vary depending on the detectors and sample properties, there are cases where nuclides below the detection limit are detected.

<sup>\* &</sup>quot;ND" indicates that the measurement result is below the detection limit.
