

Fukushima Daiichi Nuclear Power Station: Analysis Results regarding the Discharge of Treated Water in the Subdrain and Groundwater Drain Systems

Unit: Bq/L

	North side of Unit 5 and 6 drainage opening		Port opening	
	Before discharging ^{*1}	During discharging	Before discharging ^{*1}	During discharging
Date				
Status	Before discharging ^{*1}	During discharging	Before discharging ^{*1}	During discharging
Time				
Cs-134				
Cs-137				
Gross β				
Tritium				

* "ND" means not detectable. The number shown in parenthesis is the detection limit.

^{*1} The data represent the sampling results after the previous discharge of water from a temporary water storage tank.
