

Completion of Dismantling Flange Tanks in the H1 East Tank Area at Fukushima Daiichi Nuclear Power Station

For Reference
October 29, 2015
Tokyo Electric Power Company

■ The dismantling of 12 flange tanks in the H1 east tank area started on June 8, 2015 and completed on October 28, 2015.

■ No significant rise in the concentration of radioactive materials was found at the site during the work period. TEPCO will continue to work on dismantling other flange tanks with safety as a top priority.
