

Overview of Torao Hydro Power Station

1. Overview

- River System/River Name Kannagawa River in Tonegawa River System (1st Class River)
- Location Unenomura, Tanogun, Gunma Prefecture
- Maximum Output 270 kW
- Effective Head About 101 m
- Maximum Water Use $0.35\text{ m}^3/\text{s}$
- Type of Facility Waterway

2. Location Map

The map is made by "Map System in TEPCO's Intranet (Hokkaido Chizu GISMAP)".

3. What is waterway to bypass river water of the upstream of the reservoir? (Water Bypass Way)

It is a facility to take water at an intake dam located in the upstream of reservoir and release the water to the downstream of the reservoir. The facility is built to reduce a change of water quality of downstream of dam and effects on circumstances of flora and fauna.
