

<Compensation for household goods in houses damaged by the earthquake or Tsunami>

Degree of damage	Damage state of the house : [Examples of earthquake damage by house structure]	Compensation amount ratio
Collapse	<ul style="list-style-type: none"> • A case where the house was collapsed by the earthquake • A case where the house was carried away by Tsunami <p>For houses that collapse or loss is confirmed by satellite photo, etc., the houses are considered as collapsed.</p>	20% of the compensation amount calculated based on the number of family members and family structure in the zone where residents cannot return for a long time
Total loss	<ul style="list-style-type: none"> • A state where the house is structurally destroyed and residents cannot continue to live • Due to Tsunami, a half height or more of the house was flooded <p>[Wooden structure] Destruction of a half or more of pillars or basement, or tilt of house that can be felt</p> <p>[Steel frame structure] Tilt of house that can be felt, or fall of a half or more of external walls</p> <p>[Reinforced concrete structure] Tilt of house that can be felt, or loss with which steel frames of a half or more of pillars or beams can be seen on floors severely damaged</p>	100%
Half loss	<ul style="list-style-type: none"> • A state where the house is structurally destroyed and residents cannot continue to live without extensive repair • Due to Tsunami, 1 m or more above the floor of the house was flooded <p>[Wooden structure] Tilt of pillars or tilt of walls with which some rooms cannot be used</p> <p>[Steel frame structure] Cracks or joint opening of external wall material with a half or more of external walls</p> <p>[Reinforced concrete structure] Cracks of 40% or more pillars and beams with which steel frames can be seen on floors severely damaged</p>	100%
Partial loss	<ul style="list-style-type: none"> • A state where the house is not structurally destroyed much and can be recovered with relatively small repair • Due to Tsunami, the house was flooded above the floor <p>[Wooden structure] Damage that requires repair for pillars, basement, roof, external walls, etc.</p> <p>[Steel frame structure] Difficulty in open/ close for a part of openings. Visible cracks or joint distortion of external walls</p> <p>[Reinforced concrete structure] Visible cracks of 20% or more pillars and beams on floors severely damaged</p>	100%
