

Amount of water injection assumed in MAAP analysis for Unit-1

The amount of water injection into the reactor has been set in the MAAP analysis for Unit-1 as not exceeding the daily average of water injection, based on the operation records made public so far (Figure 1).

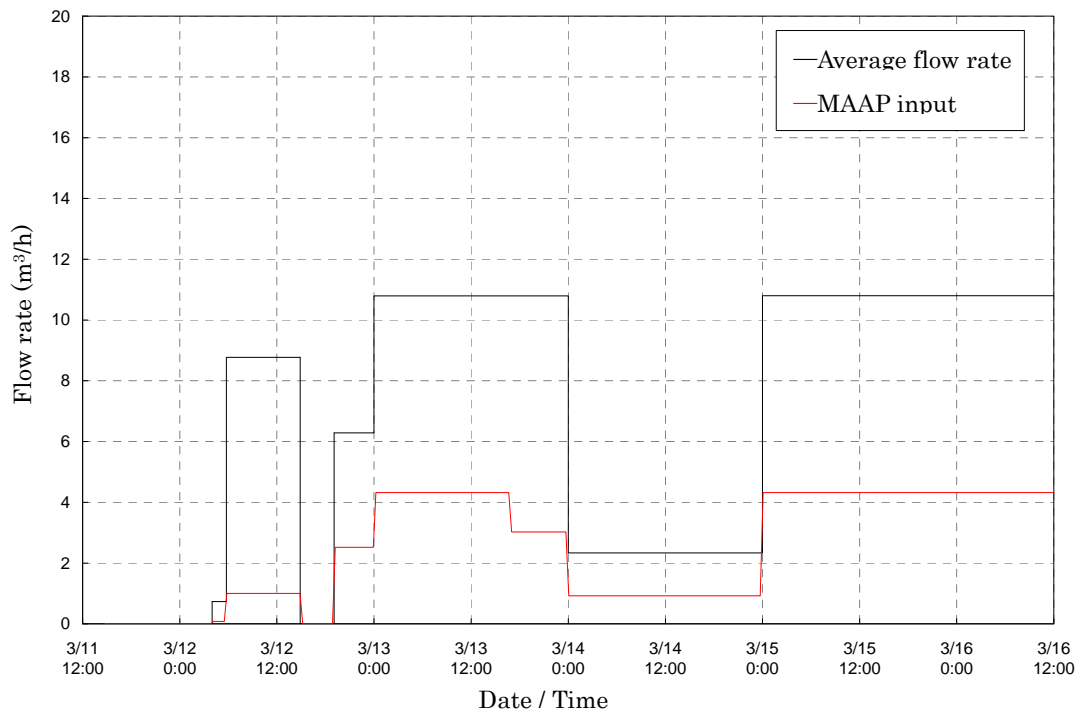

Figure 1 Amount of water injection assumed in MAAP analysis for Unit-1*1

*1 The amount of water discharged by fire engines is updated reflecting detail operational records and described in Attachment 1-4, Figure 5.
