*An equivalent dose is a measure of the radiation doses of internal organs and tissues, and the equivalent dose limit to the skin is 500mSv/year (the emergency exposure dose limit is 1Sv).

*Two contractors shown in the "500-1000"dose range were exposed to radiation during the period when the emergency exposure dose limit was set to 1Sv.

*The value of the exposure doses and the number of the workers in the table above are subject to change due to the replacement of APD data with monthly dose data measured by integral dosimeters or the update of the dose data of the workers who wear only integral dosimeters (ex., the workers who enter only the Main Anti-earthquake Building) after the publication.
