

# Storage amounts of ALPS treated water, etc. broken down by the sums of ratios to regulatory concentration limits (estimate) (As of December 31, 2021) **TEPCO**

※4 Includes ALPS treated water, etc. that was additionally transferred (after October, 2018) after measuring radiation concentrations. Since only a small amount of water was additionally transferred the estimated sum of the ratios to regulatory concentration limits for the 62 nuclides in the relevant tank groups has been deemed to be the same as the value calculated from actual measurement results.

※5 Increased by approx. 3,200 m<sup>3</sup> in conjunction with water transfer from the high-performance ALPS sample tanks.

※6 In FY2013, slurry treated to remove carbonate precipitation treatment was accidentally allowed to flow out of the facility outlet due to a nonconformance with the existing ALPS cross-flow filter.
